One can always think of a change, Doing the routine things on daily basis is not a good sign and its boring.. You need a touch screen PC for that So for every day browsing it gets the job done but leaves a little to be desired in the functionality category.. The strongest use case for the Windows platform is that you can use a keyboard for writing, so any Direct Message (DM for short) power users will have an easier time.. Deskgram is a desktop app that lets you post to Instagram from PC or Mac, as well as browsing, commenting, and liking posts as you would on the mobile app.
